

DIGISOFT.TV BRINGS DVR CAPABILITIES TO ITS DISKLESS DONGLE THANKS TO ANEVIA CLOUD DVR

Partnership is set to drastically reduce the cost of IPTV platforms

11 September 2015 – Cork, Ireland: Anevia, an innovator of telecommunications and Video on Demand applications, today announced it had entered into a Strategic Partnership Agreement with Digisoft.tv, a global multiscreen platform provider for the broadcast and media industry.

The focus of the partnership will be the integration of ViaMotion INFINITE into Digisoft.tv's "CastCatcher" HDMI product range. The result will be the most advanced and cost effective IPTV solution available today.

CastCatcher not only includes built in support for Digisoft's multiscreen secure client applications across all mobile platforms, but thanks to Anevia it now also provides full network DVR functionality in a small form factor. The solution eliminates moving parts and truck roll, two of the most costly operational headaches for operators today. This unique combination enables the delivery of an advanced, white label, multi-screen VoD solution that matches the evolving needs of today's operators.

ViaMotion INFINITE allows operators to deploy Cloud DVR services minimizing storage and network resources, ensuring the best quality of experience and providing full control over recording activities.

“This alliance allows us to meet the needs of operators deploying future-proof OTT multi-device strategies with an eye to performance, flexibility and cost-efficiency” Digisoft.tv CEO Fearghal Kelly said, “It represents the first time that Anevia and Digisoft.tv have collaborated to advance real world solutions for MVNOs”

Ian Jefferson, Vice President of Anevia commenting on the partnership said; “Viamotion INFINITE capabilities are entirely platform agnostic, the applications running on the Digisoft HDMI dongles provide further evidence of this.” Digisoft and Anevia will present and demonstrate this new service at IBC 2015.

About Digisoft.tv

Digisoft.tv is a global multiscreen platform provider for MSOs. We help operators realize the value of their infrastructure investment by building on our extensive experience in video delivery to dongles, set top boxes and consumer electronics. Our 10 foot platform is the first in the world to embrace the television as the primary device for online video.

Using our suite of innovative products and integrated partner technologies, we can help businesses get to market fast with tried and tested OTT and new media solutions across a range of client devices to realize the full set of requirements for a turn-key end to end Live TV and Video on Demand ecosystem. Visit www.digisoft.tv for more information.

About Anevia

Anevia is a leader in the creation of software infrastructure for the delivery of live television and video-on-demand services. Founded in 2003 by the developers of the VLC media-player, Anevia has pioneered the development of cloud DVR and multiscreen solutions which give television viewers wide freedom of choice in what, when and where they watch. Anevia products are used successfully in markets such as broadcasting, tier 1 and tier 2 telecommunications, and in many private and public companies. Headquartered in France, Anevia is a globally active company with regional offices in the USA and Dubai. For more information, visit our website: www.anevia.com.
