

PRESS RELEASE

ANEVIA AND TR SERVICES EQUIP THE SARAJEVO “COURTYARD BY MARRIOTT”

Gentilly, France, December 02, 2015 - Anevia is proud to announce that Serbian IT systems integrator TR Services and Project leader Teleinformatica doo Bosnia and Herzegovina have selected Flamingo head-ends to equip the “Courtyard by Marriott” in Sarajevo.

Available throughout the hotel, Flamingo head-end was chosen as part of the project to equip the hotel with a video solution compatible with the building's coaxial structure and capable of offering high-performance TV services. Flamingo captures a bouquet of satellite channels and streams them to the hotel's 134 rooms.

"Flamingo's modularity and scalability were undoubtedly the decisive factors in making our choice," commented Mr. Nihad Bubica, one of the hotel owners from Lake Company. "By embedding a coax module in the Flamingo IPTV head-ends, video content can be captured and broadcast across the hotel's existing coaxial structure. Furthermore, with the scalability feature, at any time customers can very easily add new modules and increase the number of available channels."

"We are thrilled to sign this new project, an additional signature in a long series to come in Eastern Europe with TR Services," added Nicolas Gruet, Vice-President of Sales at Anevia. "There is considerable need for this type of product in the region, and Flamingo's modularity inarguably makes it one of the most comprehensive head-end on the market, as it can be embedded in any infrastructure, be it coaxial, IP, wifi or hybrid."

"Thanks to TR Services' network of partners in Bosnia Herzegovina, Montenegro and Croatia, there are countless opportunities for development here," commented Natalia Shapkina, Anevia's Head of Sales for the hospitality industry. "We are delighted to support TR Services in order to raise our cooperation to a new level and to expand our operations in Eastern Europe" added Natalia Shapkina.

About Anevia

Anevia is a leader in the creation of software infrastructure for the delivery of live television and video-on-demand services. Founded in 2003 by the developers of the VLC media-player, Anevia has pioneered the development of cloud DVR and multiscreen solutions which give television viewers wide freedom of choice in what, when and where they watch. Anevia products are used successfully in markets such as broadcasting, tier 1 and tier 2 telecommunications, and in many private and public companies. Headquartered in France, Anevia is a globally active company with regional offices in the USA and Dubai. For more information, visit our website: www.anevia.com.

About TR Services

TRS was established in 2009 on the basis of a large French producer of telecommunications equipment, Alcatel - Lucent, who has influenced a lot the further orientation and development of the company.

Alcatel - Lucent, Anevia, SAMSUNG, Eona, Fortinet, HP, Aruba Networks, Protel, are just some of the partners who participate with us in joint projects, solutions which reinforce our reputation and performance with leading integrators of IT services in the region. TR Services provides services and expertise to create a simple technology for end users.

We design and integrate better telecommunication solutions for all business needs in the areas of infrastructure, IP telephony and applications.

Geographical coverage: Serbia, Ex-Yugoslavia (Slovenia, Croatia, Bosnia, Montenegro, Macedonia) through partnerships with local system integrators.
