

**PRESS RELEASE**

## **ANEVIA INTRODUCES NEXT-GENERATION CLOUD MONITORING FOR ENTERPRISE TV**

Paris, France, December 19, 2014: Anevia announces the first service in its new Cloud strategy. Introduced to Anevia customers and partners during its first Cloud Conference, Anevia Cloud Monitoring is a software-as-a-service based application allowing global maintenance of enterprise television deployments based on Anevia Flamingo XL and XS IPTV head-ends.

Anevia Cloud Monitoring is a multi-tenant cloud-based application allowing pro-active, easy and efficient global enterprise TV sites maintenance. With its predictive alerts feature, the Cloud Monitoring service allows lost-channel issues such as lapsed subscriptions to be identified and rectified automatically before they cause significant interruption to the viewing experience. The service also avoids TV service disruption linked to loss of conditional-access management rights. Each Anevia head-end, from any location, pushes its status data on regular and controllable basis all its using cloud technology.

Anevia Cloud Monitoring provides a basis for the global maintenance of a worldwide enterprise IPTV operation with secured alerts. All this information can be viewed instantly via a dedicated monitoring interface. Anevia's unique smart information processing is used to generate alerts automatically with emailed notifications of identified events such as satellite broadcast channel changes.

"Anevia Cloud Monitoring takes the IPTV viewing experience to an entirely new level, ensuring minimal television service disruption and greatly increased customer satisfaction thanks to its predictive functions," comments Anevia's co-founder and CTO Damien Lucas. "Next year we will be introducing additional cloud-based capabilities to provide enhanced line-up and configuration of cloud-TV channel delivery services. The objective is to ensure that technical issues throughout an IPTV chain are detected and corrected before they result in a subscriber being faced with a blank screen Anevia Cloud Monitoring is available now to all customers who have an Anevia system maintenance contract.

### **About Anevia Enterprise**

A business unit of Anevia, Anevia Enterprise ([www.anevia-enterprise.com](http://www.anevia-enterprise.com)) delivers solutions to hotels, cruise ships, aircrafts, educational facilities, government bureaus and corporations looking to deploy advanced live and on demand video over IP streaming services.

Anevia (Euronext NYSE: ALANV) is a leader in the creation of software infrastructures for the delivery of live television and video-on-demand services. Founded in 2003 by the developers of the VLC media-player, Anevia has pioneered the development of video content delivery networks which give television viewers wide freedom of choice in what, when and where they watch. Anevia products are used successfully in markets such as broadcasting, tier 1 and tier 2 telecommunications, and in many private and public companies. Anevia's enterprise products are being used successfully across all continents by hundreds of hotels, cruise ships, airlines, educational facilities, government bureaus and corporations to deploy advanced video services, both live and on demand. Headquartered in France, Anevia is a globally active company with regional offices in the USA, Brazil, Dubai and Singapore.
