

PRESS RELEASE

QUADRIGA TEAMS UP WITH ANEVIA TO EQUIP THE GRAND HOTEL SUISSE MAJESTIC IN MONTREUX

Gentilly, March 29, 2016 – Anevia is pleased to announce that Quadriga, an international provider of Internet and entertainment services for the hotel industry, has selected the Flamingo head-end to be a part of a project to upgrade the technical infrastructure of the prestigious Grand Hôtel Suisse Majestic in Montreux.

Built in the heart of Montreux in 1870, the Grand Hôtel Suisse Majestic is a jewel of the “Belle Époque”. A 4-star superior hotel, it offers nine seminar rooms, a fitness centre, a cigar lounge, a bar, a panoramic restaurant and a patio with one of the most beautiful views of the Vaud Riviera, Lake Geneva and the Alps. As part of a comprehensive plan to fully overhaul the luxury establishment’s entertainment infrastructure, including switching its telephone, Wi-Fi and video services to an IP platform, the Flamingo gateway will distribute DTT and satellite channels to the hotel’s 155 rooms.

“In order to guarantee the best service for our clients, the IPTV gateway must ensure high-quality performance, reliability and robustness. Flamingo unquestionably met these requirements,” said Mr Mourier, Technical Director of the Grand Hôtel Suisse Majestic. “The teams from ANEVIA supported us throughout the entire project in order to quickly and efficiently set up the gateway.

“We’re delighted about this new collaboration with Quadriga, our first on the Swiss market. It bodes well for further collaboration with the group in the future,” said Nicolas Gruet, VP of Sales at Anevia.

“Anevia provided us with expert service for the digital TV component, allowing us to set up quickly and professionally,” added Laurent Leschot, Sales Director for Central Europe at Quadriga.

Flamingo’s line of IPTV head-ends are modular, easy to configure and easy to deploy. Whether they are satellite, cable, or DTT channels, Flamingo retrieves TV/radio content directly from the source before streaming it to TV decoders, PCs and other peripherals connected through IP networks. Capable of delivering hundreds of streams from a single box, Flamingo is also able to support the growth of all types of infrastructure thanks to its ultra-modular design.

About Anevia

Anevia is a leader in the creation of software infrastructure for the delivery of live television and video-on-demand services. Founded in 2003 by the developers of the VLC media-player, Anevia has pioneered the development of cloud DVR and multiscreen solutions which give television viewers wide freedom of choice in what, when and where they watch. Anevia products are used successfully in markets such as broadcasting, tier 1 and tier 2 telecommunications, and in many private and public companies. Headquartered in France, Anevia is a globally active company with regional offices in the USA and Dubai. For more information, visit our website: www.anevia.com.
