SPORTS VIDEO PRODUCTION LEADER ‘HOST BROADCAST SERVICES’ SELECTS FLAMINGO HEADENDS BY ANEVIA

Gentilly, France, September 08, 2015 – Video solutions expert and event provider VIDELIO-Events Utram has decided to equip its post-production company Host Broadcast Services (HBS) with a Flamingo IPTV headend by Anevia – to be deployed in their new French headquarters in Boulogne Billancourt.

Host Broadcast Services (HBS) is an independent host broadcast organization allowing sports federations and organizing committees around the world to provide coverage for their respective events.

HBS’ decision to deploy the Flamingo suite of IPTV headends relied upon several key criteria, from Flamingo’s ability to preserve video streams all the way to its modularity, high-quality and ease of deployment and configuration. Last but not least, stream security being a major concern for broadcasters and right owners especially in the sports industry, Flamingo’s ability to support multiple DRMs made a huge difference.

“We have been deploying these headends for several years now, so we know the kind of high-level service they deliver. When we were asked to select a robust and high-performance system, Anevia quickly turned out to be the obvious choice” Olivier Chaminade, CTO, VIDELIO – IEC explains.

« We are thrilled to have been chosen by video experts like HBS. This new customer reference, the latest in a long list of deployments in the corporate sector, is yet another testament to Anevia’s acute expertise and ability to deliver innovation quickly,” Damien Lucas, Anevia CTO and co-founder, concludes.

Flamingo is a suite of modular, easy-to-configure-and-deploy IPTV head-ends by Anevia. After capturing live TV & radio content from satellite, cable and digital terrestrial sources, Flamingo streams it over to set-top boxes, PCs and other connected devices over IP or Coax. Flamingo is able to deliver hundreds of simultaneous channels from a single set-top-box while its scalable design grows with your infrastructure. Launched in December 2014, the Anevia Cloud Monitoring software-as-a-service application allows remote supervision of all headends and their built-in components.

About VIDELIO

As a leader in France (16 agencies) and with an international presence, VIDELIO – IEC (www.videlio-iec.com) has been a daily companion for over 30 years of its clients and partners by offering audiovisual engineering services, equipment integration, maintaining technical installations in operational condition, training and supplying delegated staff to operate the equipment on site.

About Anevia

Anevia (Euronext NYSE: ALANV) is a leader in the creation of software infrastructure for the delivery of live television and video-on-demand services. Founded in 2003 by the developers of the VLC media-player, Anevia has pioneered the development of cloud DVR and multiscreen solutions which give television viewers wide freedom of choice in what, when and where they watch. Anevia products are used successfully in markets such as broadcasting, tier 1 and tier 2 telecommunications, and in many private and public companies. Headquartered in France, Anevia is a globally active company with regional offices in the USA, Brazil and Dubai. For more information, please visit www.anevia.com”
