

## **COM NET INC. CHOOSES ANEVIA NEA-DVR AND NEA-CDN TO POWER TURNKEY HOSTED AND MANAGED OTT STREAMING SERVICES**

[Anevia](#), a leading provider of OTT and IPTV software solutions, was chosen by Com Net Inc. (CNI) to deliver cloud DVR and CDN services as part of their hosted and managed OTT head-end. CNI is working with Minerva Networks to supply the hosted and managed video head-end for Minerva's white label cloud video offering for pay TV operators throughout the US. Anevia's NEA-DVR and NEA-CDN are key components of this offering, powering advanced pay-TV services to set-top boxes and connected consumer devices.

The streaming solution, called Minerva Your TV Now, includes content transport rights for live national and local channels, as well as video streaming features such as Catch-Up TV, Restart-TV, Pause Live TV and Cloud DVR: <https://www.minervanetworks.com/minerva-launches-turnkey-cloud-video-service-for-cable-and-telco-operators/>. It enables operators to protect their existing investment by providing new services to current subscribers, with an upgraded user experience on deployed IP and hybrid set-top boxes, while also attracting new users through the BYOD model.

CNI selected Anevia's cloud DVR, NEA-DVR, to provide subscribers with a selection of modern viewing options. These include restart TV for up to 150 channels with up to 72 hours of catch-up viewing, and 50 hours of personal video recording. Operators also have the option of adding more storage to the cloud DVR service if needed.

According to Grégory Samson, Executive Vice President Sales, Media and Telecom at Anevia, "Anevia is proud to be part of CNI's head-end that powers Minerva's Your TV Now platform. With NEA-DVR, operators can now propose the most modern OTT features, to existing set-top boxes and to a multitude of consumer devices, to increase customer satisfaction long into the future."

"We needed a cloud DVR and CDN solution that would fit with our managed services model, and that is designed to scale" says Randy Plaisier, CTO of CNI. "Anevia's NEA-DVR and NEA-CDN work together seamlessly, enabling operators to reduce costs and optimize bandwidth performance, while scaling for peak viewing."

Minerva will demonstrate the Your TV Now platform at the SCTE Cable-Tec Expo, booth 2131, in Atlanta from 22 – 25 October.

### **About Anevia**

Anevia is a leading OTT and IPTV software provider of innovative multiscreen solutions for the delivery of live TV, streaming video, time-shifted TV and video on demand services. The company offers a comprehensive portfolio of video compression, multiscreen IPTV head-

ends, Cloud DVR and CDN solutions to enable viewers to enjoy a next-generation TV experience – anywhere, anytime and on any screen - including 4K UHD content. The solutions have been widely adopted by globally-renowned telecom and pay-TV operators, TV broadcasters and video service providers in hospitality, healthcare and corporate businesses.

Founded in 2003, Anevia has a track record of being first to market with advanced video technologies. The company is a member and active contributor to several TV, media and hospitality industry associations. Headquartered in France, with regional offices in the USA, Dubai and Singapore, Anevia is listed on the Paris Euronext Growth market.
