

PRESS RELEASE
GENTILLY,
11/03/2019

ANEVIA AND QUADRILLE PARTNER TO JOINTLY OFFER OTT OVER SATELLITE

[Anevia](#), a leading provider of OTT and IPTV software solutions, and Quadrille, a leader in delivering file and live content over satellite, have strengthened their partnership to offer OTT over satellite. The joint solution will enable content providers and operators to offer cost-effective live-TV services, without sacrificing stream quality, in situations where it was previously unavailable due to limited bandwidth - such as high-speed trains, inflight entertainment, off-shore sites and university campuses.

This complete OTT-over-satellite solution includes Anevia's GENOVA smart transcoder and NEA-LIVE packager to prepare live channels. The OTT stream is delivered via satellite using Quadrille's QuadriLive™. On the receiving side, Anevia's Flamingo embeds Quadrille's software to re-transform the signal and enable a multi-screen viewing experience on any smart device. This highly scalable multiscreen TV solution provides ultra-low latency and high-quality video services, anywhere and at any time.

The latest collaboration between Anevia and Quadrille strengthens a partnership that started with the launch of an innovative approach to a Replay solution for Canal+ to address the hospitality and healthcare markets. This solution has already been deployed in many French hotels and hospitals and is being used by 20,000 unique viewers every day.

Xavier Battas, CEO, Quadrille, commented: "Quadrille is a leader in delivering content over the air, so our DNA has always been broadcast. Working alongside Anevia is an excellent opportunity to expand our OTT offerings to help content providers keep up with consumer expectations and their viewing habits."

Ivonne Prugnaud, Vice President Sales Worldwide Enterprise, Anevia added: "Consumers increasingly want to watch TV anywhere, at any time, all with a high-quality viewing experience. From live streaming to video on demand, the growing partnership between Quadrille and Anevia will help service providers deliver a unique experience across any network."

Find out more about the OTT over satellite solution when Anevia and Quadrille attend Cabsat, Dubai, 12-14 March.

About Anevia

Anevia is a leading OTT and IPTV software provider of innovative multiscreen solutions for the delivery of live TV, streaming video, time-shifted TV and video on demand services. The company offers a comprehensive portfolio of video compression, multiscreen IPTV head-ends, Cloud DVR and CDN solutions to enable viewers to enjoy a next-generation TV experience – anywhere, anytime and on any screen – including 4K UHD content. The solutions have been widely adopted by globally-renowned telecom and pay-TV operators, TV broadcasters and video service providers in hospitality, healthcare and corporate businesses.

Founded in 2003, Anevia has a track record of being first to market with advanced video technologies. The company is a member and active contributor to several TV, media and hospitality industry associations. Headquartered in France, with regional offices in the USA, Dubai and Singapore, Anevia is listed on the Paris Euronext Growth market.
