### ORGANIC GROWTH UP 7%, DRIVEN BY BOTH THE TELECOM AND ENTERPRISE BUSINESSES

Anevia announces first-half revenue of €7.2 million, representing organic growth of 7%. All businesses contributed to this performance.

Revenue for the **Telecom business** went up 9% to €5.3 million over the period, a significant achievement on the back of four consecutive years of double-digit growth.

The **Enterprise business**, which increased its revenue by 2% to €1.9 million, has proved to be a steady activity that contributes to the company's growth.

### SIGNIFICANT PROGRESS ON THE STRATEGIC PLAN

In addition to organic growth, which was a priority for Anevia, the first six months of the year saw significant progress towards the objectives of its strategic plan:

- **Stepping up the roll-out of sales initiatives in the United States**

Several major initiatives rolled out in the United States in the first half of 2019 generated new revenue from contract extensions, a testament to the loyalty of existing customers.

- **Capturing sales opportunities in Asia**

Asia is a priority market for Anevia that offers myriad sales opportunities. In one example, Indonesia's biggest media group, MNC, recently opted for Anevia solutions.

- **Strengthening strategic partnerships**

In the first half of the year, the Enterprise business signed two important new partnerships for the distribution and deployment of its products and related services.

- **Capitalising on the sales potential of end-to-end solutions**

Following the acquisition and integration of Keepixio in 2018, Anevia has been in the unique position of being able to offer end-to-end solutions incorporating ultra-low latency technologies.

Since its launch at the end of 2018, this offering has attracted several operators in Europe, Asia and the United States in the first six months of the year.
