FLAMINGO TECHNICAL TRAINING

Certified Training for Flamingo TV head-end

Flamingo Technical Training is an intensive course for Anevia resellers, system integrators and technical partners who wish to include the Flamingo solution in their portfolio and provide installation and support services. The course targets pre-sales, installation and support service engineers. It covers the fundamentals of IPTV and linear/non-linear streaming, the technical characteristics of DVB reception, the main features of the Flamingo product series, procedures for product installation and configuration, support procedures and troubleshooting methods.

There are three training levels to allow candidates to gain the level of expertise they need. Certification is awarded upon successful completion of all three training levels. It officially recognises the candidate as qualified to install and maintain Anevia's products.

anevia 
YOUR NEXT GENERATION TV, NOW

WHY TAKE THE FLAMINGO TECHNICAL TRAINING COURSE?

SUCCESSFUL TRAINING FOR SUCCESSFUL SALES

• Become a certified Flamingo reseller:

The technical training course gives you the technical know-how that will enable you to sell the Flamingo TV head-ends. The standard level of the course allows pre-sales engineers to include Flamingo gateways in product presentations.

• Become a certified Flamingo integrator:

The technical training course enables you to become an official Flamingo integrator and to provide first-level support services. You will gain the in-depth skills needed to ensure optimised and efficient installation and to solve problems more quickly.

• Increase your product portfolio and your sales:

Knowledge of the Flamingo TV head-ends enables you to include the product in your portfolio and to extend your solution offering. By covering a wider range of products, your portfolio becomes more attractive and you increase your sales.

• Meet your customer needs more effectively:

Anevia's products have been designed to meet real customer needs. Anevia's success is illustrated through over 3,000 deployments in more than 70 countries. We have a wealth of experience and knowledge that we can share with our partners.
