

## **Anevia Flamingo Headend Voted Best Enterprise Video Solution in the 2019 Streaming Media European Readers' Choice Awards**

Anevia, a leading provider of OTT and IPTV software solutions, has been voted the winner of the Enterprise Video Solution category in the 2019 Streaming Media European Readers' Choice Awards for its Flamingo multiscreen TV headend. In addition, Anevia was also voted runner-up in two other categories for its Genova video encoding solution and its video-delivery solution including the NEA-LIVE<sup>®</sup> packager and NEA-CDN<sup>®</sup>.

Anevia's Flamingo headend securely delivers live and time-shifted TV and radio content captured from any source (digital, satellite, cable, terrestrial, HDMI, IP or web sources) to any device (set-top box, connected TV, PC, tablet or smartphone), and over any network (IP-based, coaxial or wireless). It also offers services including pause and time-shifted TV, replay and catch-up, recording, and VoD.

Hotels, hospitals, enterprises, transport companies, and others use the Flamingo multiscreen TV head-end to power innovative TV services.

The winners of the Streaming Media European Readers' Choice Awards are chosen by those who use the products rather than by a panel of experts. This makes the awards a genuine, impartial reflection of the end-users' experience of deploying the technology in the real world to deliver real benefits. Held for the eleventh time, the annual awards attracted entries for 71 products in 17 categories, with over 1,600 people casting a total of 8,000 votes.

Laurent Lafarge, Anevia's CEO, commented: "We are extremely proud to be winners in this year's awards and would like to thank all our users who took the time out to vote for us. It gives us great satisfaction to know that our technology is not only delivering on our original development objectives, but is actually meeting the real needs and expectations of those who rely on it, with a future-proof video solution that enables businesses to respond and adapt to the new communications and media consumption opportunities offered by the latest OTT and IPTV technologies."

### **About ANEVIA**

Anevia is a leading OTT and IPTV software provider of innovative multiscreen solutions for the delivery of live TV, streaming video, time-shifted TV and video on demand services. The company offers a comprehensive portfolio of video compression, multiscreen IPTV head-ends, Cloud DVR and CDN solutions to enable viewers to enjoy a next-generation TV experience – anywhere, anytime and on any screen – including 4K UHD content. The solutions have been widely adopted by globally renowned telecom and pay-TV operators, TV broadcasters and video service providers in hospitality, healthcare and corporate businesses.

Founded in 2003, Anevia has a track record of being first to market with advanced video technologies. The company is a member of and active contributor to several TV, media and hospitality industry associations. Headquartered in France, with regional offices in the USA, Dubai and Singapore, Anevia is listed on the Paris Euronext Growth market.
